## **DETAILED ACTION**

### ***Claim Objections***

1. Claims 1 and 7 are objected to because of the following informalities:  
in claim 1 line 17, "recording are" should be changed to --recording area--; and  
in claim 3, line 5, "will b stored " should be changed to --will be stored --  
Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-6 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The specification does not describe a additional storage means that store encoded data and multiplexed data as being recited in claim 1.

Art Unit: 2615

4. Claims 1 -6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, lines 10-11 and 12, there is no antecedent basis for "said storage means".

In claim 1, lines 14, 15 and 16 , there is no antecedent basis for "said encoding unit" .

In claim 1, lines 15-16, it is not clear what is meant by "**each said encoding unit requires address information of a recording unit requires address information ... system controller**".

In claim 7, line 5, it is no clear what is meant by "a single unit storage unit control of said single storage unit ".

In claim 7, lines 8-9, it is not clear what meant by " and storing multiplexed data , and storing multiplexed data ".

### ***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Katayama .

Recording claim 7, Katayama discloses a recording apparatus (Fig. 6 column 39) having encoding means for encoding video and audio signal , storage means (210, 211,212, and 216) for storing the ended data on different areas and a multiplexing means (214) for multiplexing the readout encoded data (Fig. 17) and recording means for recording the multiplexed data on area different from encoded data areas (216) .

Katayama fails to teaches that the storage means being formed as a single storage unit . However, it is noted that make a integral part from a plurality parts is obvious. Therefore, it would have been obvious to one of ordinary skill in the art to modify Katayama by forming storage means (210,211,212, and 216) of Katayama as a single storage unit .

### **Conclusion**

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Matsumi et al teaches a recording apparatus for recording multiplexed data .
